## RESIDENTIAL AND COMMERCIAL GARAGE DOORS released by: Heather Bender

---

### C-POWER™ ENABLED CLICK-TO-CONCEAL™ PANELS

#### Elegant Design Meets Intuitive Control

Introducing C-Power™ enabled Click-to-Conceal™ Panels!

Now available on our residential Avante® and Avante® Sleek models and commercial Architectural Series - Aluminum Doors (models 904/904U and 906/906U), this new option transforms a clear, full-view door into opaque panels for instant privacy at the click of a button. This technology instantly shifts spaces from public to private, adapting to daylight and enhancing visual security.

#### Design Driven by C-Power Technology

C-Power-enabled Click-to-Conceal panels are an architecturally significant solution that uses discreet power and integrated technology, hiding visible wires between sections. This centralized control eliminates the need for window treatments, preserving clean lines and uninterrupted views in both residential and commercial applications.

#### A “Two-Doors-in-One” Solution

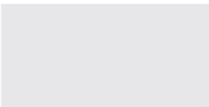

The transformative capability of Click-to-Conceal technology serves a new generation of multi-functional spaces.

- **Residential:** Transform a garage into a bright home gym, a productive office, or a welcoming entertaining area that becomes secluded and secure on demand.
- **Commercial:** A restaurant can transition from bright and inviting to private and secure. For retailers, showcase merchandise during the day, then conceal it after hours to deter theft.

#### Advanced Performance & Protection

Beyond on-demand privacy and light control, these innovative panels feature advanced UV and IR defense, engineered to neutralize the harsh aspects of sunlight. Even in its clearest state, the glass actively reduces solar heat gain and glare by blocking 99% of damaging UV rays, protecting interiors and enhancing comfort.
